AI Resource Vault

Your L&D department for AI

Ongoing Enablement

Amplifies AI across the business

Every company has access to the same AI tools. Most waste it on emails.

Your competitors have the same AI tools you do. The difference isn't access—it's knowing what to ask for. Your people can't imagine what's possible because they've never seen AI applied to *their* work. They need examples, templates, and someone who's already solved the problems they're facing. The Resource Vault is your organization's **continuous AI enablement system** — a curated library of department-specific prompts, workflows, and training content that extends your team's capabilities long after initial training ends. **Think of it as the extension of your L&D department for AI — white-glove support that grows with your needs.**

VAULT OVERVIEW

Use Cases

AI applications that work across all roles and departments. These resources address universal workplace challenges and provide frameworks that apply regardless of your specific function.

Prompt Engineering Foundations

Learn how generative AI works, get oriented with ChatGPT through introductory videos, create your personal context prompt, and understand the fundamentals of prompt engineering.

Industry-Specific Prompt Packs

Real examples of AI solving problems you actually have. Not generic "use ChatGPT for emails" advice— actual workflows for your sector and role.

Quick Wins Library

Easy starter tasks that take 10 minutes and show immediate ROI. Your team sees what's possible on day one, not week six.

Monthly Updates & Expert Support

The vault evolves as AI does. Monthly webinars cover new additions, emerging tools, and changing best practices. Plus, you can request specific resources for challenges you're facing— and talk to our experts during office hours.

AI Tool Reviews

Honest assessments of tools everyone's talking about. What they're good for, what they're not, what they can do, and whether they're worth your time.

AI Resource Vault

On-demand expertise for every "Can AI do this?" question.

Key Benefits

- Turns training into daily operational advantage
- Builds internal AI capability without adding headcount
- Continuous access to expert-level prompts and frameworks
- Protects you from obsolescence
- Pre-built templates remove "I don't know where to start" barrier
- Eliminates expensive trial-and-error

Average time Kiingo participants save with AI

How it Works

1. **Build Your Foundation:** Start with "Start Here" section. Watch introductory videos on how LLMs work, learn prompt engineering basics, and create your personal context prompt. This foundation makes everything else in the vault more effective.
2. **Get Quick Wins:** Navigate to your department (Finance, Marketing, Sales, HR, Legal, Admin, Leadership, or Management). Try a Quick Win—beginner-friendly tasks designed to show immediate value.
3. **Graduate to Prompt Packs:** Once comfortable, use sophisticated multi-step prompt chains for complex workflows. Fill in placeholders with your company context, review each step, and adjust as needed.
4. **Search & Explore (ongoing):** You can search the entire vault instantly. Can't find exactly what you need? Browse related use cases and ask "Is there a version of this problem in my work?" Cross-train by exploring other departments' resources.
5. **Request & Evolve (as needed):** Don't see a prompt chain for your specific challenge? Request it via the form on any page. The vault updates monthly based on user feedback, with webinars covering new additions and emerging AI capabilities.

Kiingo AI Adoption Model

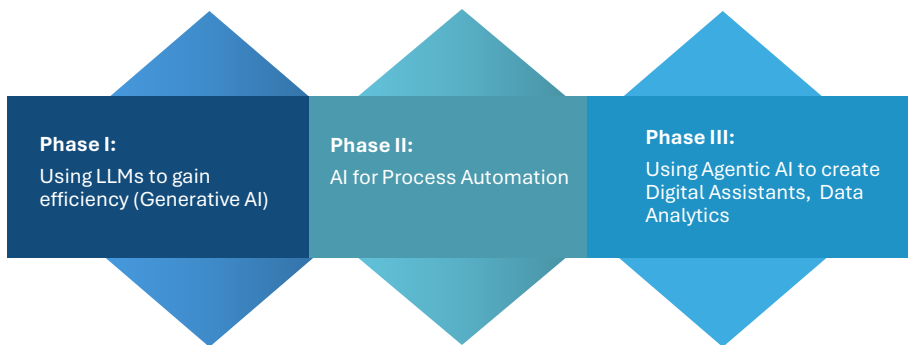

How businesses turn AI intent into real, sustained usage.

AI Resource Vault

On-demand expertise for every "Can AI do this?" question.

Kiingo AI Adoption Process Flow

A three-phase roadmap for business adoption.

From a Vistage Chair

I have clients interested in improved application of AI and can now recommend Kiingo from experience.

I was already addicted to the benefits of using AI as an advisor and research assistant, **but I feel several times more effective and now understand how to use it in the context of teams** and larger project planning and automation.

-- Todd Girvin, Vistage Chair

Why Kiingo? What a Recent Client Had to Say:

Ross knows his stuff. He's seeped in it-- it's not something he bolted on to IT or Cyber or Strategy. He knows the backstory as well as where things are heading. Plus, he's super generous with his time and seems to genuinely want to help, educate, and make what he teaches applicable!

-- Ellen Moore, CEO/ Founder of Moore Creative Strategies
